Upani Lokusuriya

Project Manager

+94 703053761 Colombo, Srilanka upanilokusuriya@gmail.com Portfolio

PROFILE

Results-driven Project Management professional with experience leading the full Software Development Life Cycle (SDLC) for enterprise fintech applications. Skilled in Agile methodologies, requirements gathering, sprint planning, stakeholder coordination, and cross-functional team collaboration. Proven ability to bridge business and technical teams, drive project execution, manage deliverables, and ensure timely, high-quality releases aligned with business objectives.

SKILLS

Project Management: Agile & Scrum Methodologies, SDLC Management, Requirement Gathering, Sprint Planning, User Requirement Specifications (URS), Stakeholder Management, Risk Mitigation.
Tools: JIRA (Backlog management), Confluence, Postman, Figma, Git, MS Office Suite.
Technical Stack: PHP (Laravel), JavaScript (React/Node), AWS, RESTful APIs, SQL.
SEO & Analytics: SEO, Google Search Console, Google Analytics, Performance Monitoring.

WORK EXPERIENCE

Search Engine Optimization Executive — Feb 2026 - Present

Port City BPO, Colombo

- Managed a cross-functional team of web developers and SEO executives, overseeing task allocation, progress tracking, and timely project delivery.
- Acted as the primary client contact, gathering requirements, managing expectations, and communicating project updates.
- Planned and monitored SEO activities, including keyword research, on-page optimization, technical SEO, and content strategy.
- Oversaw website optimization and WordPress management, including content updates, plugins, themes, and performance improvements.
- Collaborated with content writers to deliver SEO-friendly content aligned with target keywords.
- Monitored project performance through regular reporting on organic traffic, keyword rankings, SERP visibility, and website health.
- Identified optimization opportunities and coordinated improvements that increased organic traffic and search engine visibility across multiple websites.

Associate Software Engineer — Nov 2023 - Nov 2025

XGEN Group, Australia

- Developed scalable RESTful APIs for SmartOps integrations, supporting 2,500+ marketing officers.
- Improved system performance by 80% using GZIP compression for high-volume image uploads.
- Built real-time BI dashboards and reporting tools for 500+ executives.
- Refactored 4,000+ lines of legacy code into modular, reusable components, improving maintainability.
- Translated business requirements into technical URS and delivered 50+ client-focused features.
- Collaborated on release planning, backlog grooming, and client meetings to align deliverables with business goals.
- Optimized complex SQL queries for analytics, reporting, and data extraction.

Intern Software Engineer — Apr 2023 - Nov 2023

XGEN Group, Australia

- Executed a critical legacy system migration by upgrading the core codebase from PHP 5.5 to 8.2, ensuring modern security compliance and improved application performance.
- Resolved high-priority system bugs and implemented Change Requests (CRs) for major global enterprise clients, ensuring system stability.
- Collaborated with senior engineers to diagnose root causes of production issues, utilizing detailed debugging and testing methodologies

EDUCATION

Bachelor of Science (Hons) in Computer Science

University of Westminster, Associated with IIT **Jan 2023 - Apr 2027**

Studying a comprehensive computer science program, currently in my 4th year of study, with a focus on software development, databases, client-server architecture, and system design. Gained a strong foundation in computer science principles and engineering practices that have been instrumental in my professional career.
